

The background of the page is a photograph of an offshore oil rig at sea during dusk or dawn. The rig is illuminated with warm lights, and the sky is a mix of blue and orange. The sea is dark and calm.

# Are you a former Oil & Gas Worker or currently working in the sector and at risk of being made redundant?

## If so then this portal can help you.

The Talent Retention Solutions (TRS) portal is part of a government initiative to help you find work in other advanced manufacturing and engineering sectors and enable you to use your skills and experience in new career pathways. This is part of a wider programme that is designed to support the long-term attraction, retention and development of skills for Science, Technology, Engineering and Manufacturing (STEM) companies.

There are now hundreds of companies looking for skilled people from the Oil and Gas Industry to join them and this new portal will help put you in direct contact with them.

### **This service is FREE and registration is simple, safe and confidential:**

- 1.** Once you have registered, you can search for jobs and apply directly to the companies that interest you. Employers will be able to see your profile and contact you.
- 2.** There is no middle agency involved so all correspondence between you and the companies is private.

It takes just a few minutes to register and upload your CV by going through the “Employee Registration” button and following the prompts.

**Register Now:** <https://talentretention.biz/oilandgas>
